**Mr Mark Giger**

**Ms Patricia de Lille**

18 March 2013

Dear Mr Notywala,

### **RE URGENT REQUEST FOR INFORMATION RELATED TO SERVICE PROVIDER FOR CHEMICAL TOILETS IN KHAYELITSHA**

Your letter dated the 28<sup>th</sup> February 2013, was sent to my office for response.

I note the four requests that you made in this letter as follows:

- 2.1 An up-to-date signed copy of the agreement between the CoCT and Mshengu Services, including all appendixes;
- 2.2 Copies of all invoices provided by Mshengu Services to the CoCT related to this agreement;
- 2.3 Copies of all proof-of-payments from CoCT related to this agreement; and
- 2.4 Delivery notes or other signed documents that serve as proof of the delivery of the chemical toilet units.

In terms of the request for signed copy of the agreement the Resolution of the Supply Chain Management Bid Adjudication Committee that was previously sent to you by Mr. Paul Boughey is the current one; I have attached it again. For further information on this tender you can click on the below link and select October, the tender is listed under number 42.

<http://www.capetown.gov.za/en/SupplyChainManagement/Pages/AwardedTenders-2010.aspx>

The relevant information as per your request is as follows, in terms of sections 8 and 13 of the relevant tender document:

CITY OF CAPE TOWN | ISIXEKO SASEKAPA STAAT KAAPSTAD

## TENDER DOCUMENT

*In terms of the Supply Chain Management Regulations (Government Gazette 27636 of 30 May 2005)*

**TENDER NO: 418S/2009/2010**

**RENTAL, DELIVERING, PLACEMENT AND SERVICING OF PORTABLE NON-FLUSHING CHEMICAL TOILET UNITS FOR INFORMAL SETTLEMENTS AND PUBLIC TRANSPORT INTERCHANGE SITES WITHIN THE CITY OF CAPE TOWN**

**CONTRACT PERIOD: 1 November 2010 until 30 June 2013**

### **8. CLEANING AND MONITORING GUIDELINES**

Communal toilets are mostly locked and the cleaning contractor must liaise with the relevant community members to unlock the doors. Both the fixed chemical toilet storage tanks and the removable chemical toilet storage tanks must be serviced by Vacuum Tanker with high pressure water dispensing unit and or Honey Sucker with high pressure water dispensing unit with an ideal

minimum storage capacity of **2.5 kilolitres**. With each cleaning cycle the interior of the toilet structure, the toilet pan and seat should be jet cleaned and disinfected with an approved chemical.

Guided by the number of users per day and the resultant pan soiling, the number of cleaning staff from the community should be determined in order to perform consistent cleaning cycles per day for each toilet (as determined by the City's Project Manager), in addition to the Vacuum Tanker with high pressure water dispensing unit and or Honey Sucker with high pressure water dispensing unit cleaning. The daily manual cleaning should include cleaning and disinfecting, with an approved chemical, the toilet interior, -pan and –seat, including the 2 m perimeter of each toilet.

Any waste spillage should be cleaned and the area properly sanitised and disinfected. Human contact with waste should be avoided by using approved PPE.

The designated waste disposal site will be the Borchard's Quarry WWTW, unless otherwise approved and notified. The transport of extracted waste, to the Borchard's Quarry WWTW, should always be within a suitably approved sealed container (built in as part of the mechanical servicing unit), with no spillage to occur.

After each cleaning cycle, 20 litres of the toilet waste container volume should be filled (recharged) with an approved chemical which is not harmful to toilet users, waste disposal site, dispensing staff, and the environment. Chemical should be able to break down faeces, control bad odour (bad smell), and with fragrance to assist with the breakdown of organic waste faeces and consistently expel any foul odour with a pleasant fresh fragrance. The recharge liquid should be based and capable to break down waste and dispel odours in a pH range of 5 – 8.5 and a temperature range of up to 50 °C.

**A certificate of chemical approval, for the use in the toilets, from a registered laboratory, to be submitted with your tender submission.**

## **9. CONTRACT PERIOD**

The contract period shall be from **1 November 2010 to 30 June 2013**. Successful contractor/s is required to take over **effective 1 November 2010** and should rollout out the required number to toilets units (4500 if one contractor and or 2250 units if two contractors), and implement servicing schedules. The required staff, fleet and equipment to be in place effective 1 November 2010.

## **10. LOCAL LABOUR**

Contractor/s shall be required to maximise opportunities for the local unemployed people from informal settlements within which they operate through the use of labour intensive methods as per the **EPWP guidelines**. (Guidelines are available from [http://www.epwp.gov.za/Downloads/technical\\_legalguidelines.pdf](http://www.epwp.gov.za/Downloads/technical_legalguidelines.pdf))

All unskilled labour should be sourced from the local informal settlement community. The selection of local labour shall be made in consultation with City of Cape Town officials.

In accordance with the Code of Good Practice for Employment and Conditions of Work for Special Public Works Programmes (clause 10.4), the public body must set a rate of pay (task-rate) for workers to be employed on the labour-intensive projects.

The contractor will be finally responsible to ensure that work quality is according to the specified standards. Depending on the size of the rollout project, the services of a Community Liaison Officer

(CLO) can be employed as directed by the City's Project Manager. The CLO will be appointed for the duration of the project until site handover and payment will be via the contractor on a monthly basis as per hourly rate as stipulated by the contractor and the CLO agreement.

All invoices submitted for payment should be accompanied with monthly labour reports in the format prescribed by the City of Cape Town, attached as **Annexure A3**.

## **11. VEHICLES**

All vehicles are to be roadworthy at all times and must make provision for the safe and lawful transportation of workers and have human waste material in sealed containers. The minimum requirements of this servicing unit must, among others, have a sealed container for waste, fixed to the chassis of the vehicle. The vehicle must also have a separate potable sealed water container, with a minimum size of 1 kilolitre for toilet cleaning and chemical mixing.

## **12. a PROTECTIVE EQUIPMENT AND HEALTH CARE**

The approved contractor/s will be required to adhere to the Occupational Health and Safety Act (Act No 85 of 1993) and provide the following PPE:

- Gumboots
- Rain suit with hood and reflective strips
- Reflective vests
- PVC gloves – Elbow length
- Respirator masks
- 2 sets of overalls – start clean every day
- Anti bacterial skin cleanser
- Access to shower facilities for contractor staff (for after work)
- Inoculation injection for staff as recommended by competent Health practitioner

## **12. b EQUIPMENT FOR CLEANING TOILET INSIDE AND OUTSIDE**

Community labourers should in addition to the PPE, be issued with cleaning equipment as follows spade, rake, chemicals, refuse bags, rags, mops, brooms, etc. Contractor should take care of on-site storage of chemicals under control of the community workers and will be liable for any damages and or fires caused by the chemicals.

## **13 QUALITY CONTROL**

The monthly processing of payment certificates will require a breakdown of invoices per Informal Settlement and or Public Transport Interchange serviced, indicating the following:

- Delivery and collection charge (if applicable) - Item 1.1 Price Schedule
- Applicable daily rental charge per unit multiplied by number of days – Item 2 Price Schedule
- Waste extraction and mechanical cleaning of interior of the portable chemical toilets; to fill (recharge) toilet waste container with chemicals and to dispose waste at waste disposal site charge multiplied by the number of toilets – Item 3 Price Schedule

- Applicable miscellaneous labour charges - Item 4 Price Schedule

The successful contractor will also be required to be available to attend monthly meetings with the City's official.

All invoices submitted for payment should be accompanied with access control sheets of waste disposal sites and a vehicle tracking report, which should amongst other contain information of dates, times and locations.

Drivers will be required to complete access control sheets at the waste disposal site.

Contractors will be required to annually submit schedules of PPE issues duly signed by beneficiaries.

The following is how the department monitors the service provided by Mshengu Services:

- Below are the recorded received waste volumes at Borchards Quarry for February 2013 – records reflect settlements serviced, volumes and the condition of the truck's for spillages are also checked. Recorded volumes are compared with total number of toilets on site.

5014

Additional to the above:

- Community workers (where present) monitor the contractor, report on services and receive delivery notes.
- Spot checks are done to verify if service was conducted and check the quality of service. This includes interviews with members of the community about service satisfaction.
- A comparison is done between invoices and vehicle tracker reports.
- The Utility Services department works closely with Environmental Health Practitioners' who visit all settlements at least once a week in their respective districts.
- Monthly meetings are held with the contractor to discuss challenges.

Currently the department is in the process of investigating the possibility of fitting chips on chemical toilets that will enable the department to track each time a toilet is serviced and transmit live reports.

Kind regards,

**Councilor Ernest Sonnenberg**  
**Mayoral Committee Member for Utility Services**
